

ACTIVITY: EDUCATE LOCAL CHILDREN BY ELDER VILLAGERS
(11 JULY 2004)

Mr. Nimu Rayohkaree, an important local villager who has participated in the Hornbill Nest Adoption Program since 1994, guided a group of children to visit a Rhinoceros hornbill nest site near Talohta Village.

Along the way, he taught the children important fauna and flora. The transfer of knowledge from the elders to the children is a key activity in sustaining this program into the future generation.

In the blind to watch Rhinoceros Hornbill
