

GROUND HORNBILLS HAVE LOST MANY OF THEIR NESTS IN THE WILD – SO THE MABULA PROJECT IS REPLACING THEM WITH ARTIFICIAL NESTS SO AS TO HELP STOP THE DECLINE IN THE POPULATION OF THIS AWSOME BIRD –

**WILL YOU SPONSOR ONE?
\$100 – Rand 500 - £75 PER NEST:**

- With your chosen name burnt onto the nest:
- A photograph of it in the nesting tree:
- A yearly summary of the activity in the nest during the breeding season.

If your nest is lucky enough to have a second chick hatch in it, the Mabula Ground Hornbill Project will hand rear it for release back into the wild, into a non-viable group, or to join the Captive Breeding Programme. Our chicks are named for their nest.

During the next three years The Mabula Ground Hornbill Project plan to make and put up these artificial nest boxes in the Limpopo River Valley, and other areas of South Africa, to encourage breeding - where the lack of suitable nesting trees is one of the reasons for the decline in the population of this important flagship species.
